1955/2024

Established as Metaldomus in 1955, Friulana accessori is a benchmark company producing technical accessories for furniture and has always been acknowledged for its quality, expertise and reliability. Throughout its history spanning 70 years, the company has successfully embraced tradition and innovation. Its strength lies in its specialised manufacturing expertise, which has allowed it to combine efficient state-of-the-art technology with typically Italian fine craftsmanship.

From the company's historical archive:
machine for stitching sheet metal, 1950s.

OUR PHILOSOPHY

For Friulana accessori the attention to the environment and human resources is a prerogative.

friulana's world

In the 1980s, Friulana accessori embarked on an environmentally friendly path by planting more than 300 fir trees and Lebanese cedars on the land surrounding its production facility.

Over the years, we have constantly fulfilled our commitment to a sustainable future. Each new product is designed and manufactured bearing in mind its entire life cycle in order to limit its environmental impact. All waste from industrial processes has always been collected and fed back into the production cycle.

Corporate sustainability means not only making an effort to protect the environment but also the ability to work while considering the social context in which the company operates and the people who work for the company. Friulana accessori aims to adopt a business development model that has a positive impact on the community.

‘Can industry set itself goals? Are these to be found in profit figures alone? Is there not something more attractive beyond the apparent rhythm, a destination, a vocation even in the life of a factory?’

A. Olivetti, *“To the Workers of Pozzuoli”* – Speech for the inauguration of the Pozzuoli plant, April 23, 1955 – City of Man, Edizioni di comunità, Verona 2019, p. 124*

At Friulana accessori we believe in people, ideas and products. We believe that the time has come for a new kind of economy that respects people and the environment. We believe it is right that everyone plays their part. We have therefore decided to give back some of the wealth that comes from the local area by backing projects which support future generations.

MODULAR

Modular is a revolutionary furnishing system for under-cabinet spaces. Thanks to its innovative and patented design, differences in height between a worktop and a wall unit can be solved. It is highly customisable and its practical shelf profile allows new accessories to be quickly added if required.

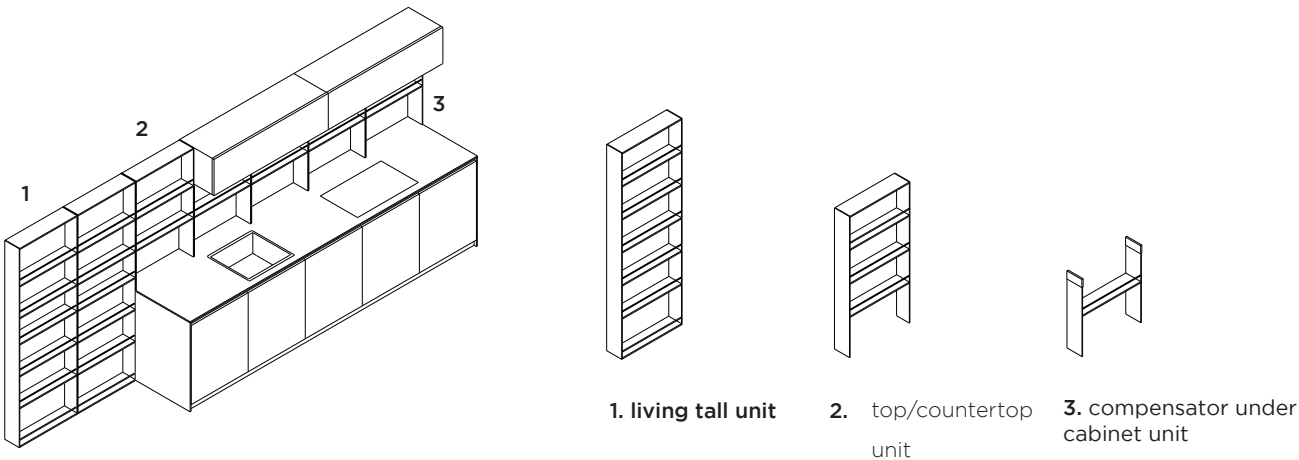

modular

MODULAR UNDER CABINET AND TALL-UNIT

The great flexibility of the Modular system allows it to be used not only as under-cabinet solution but also as a countertop and floor-standing tall unit.

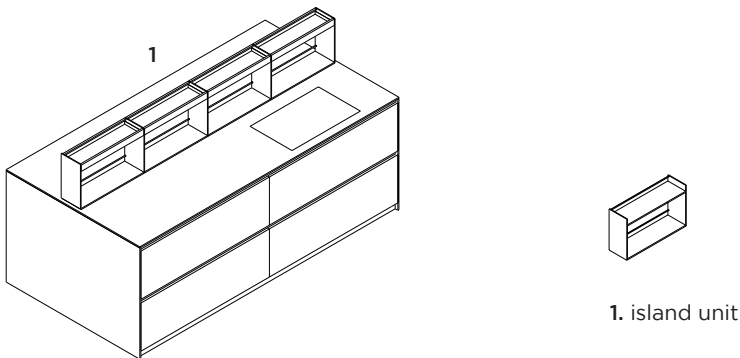

technical references page 45

MODULAR ISLAND

Modular can also be used as a distinctive island worktop element an elegant and functional way to have all the necessary accessories to hand.

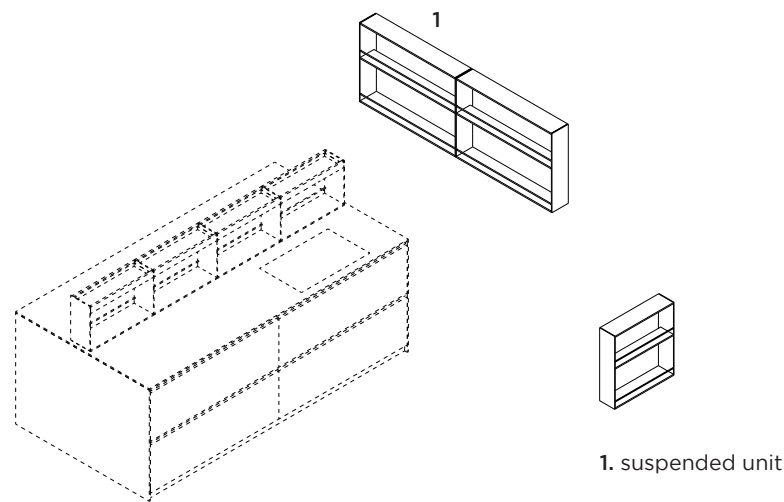

technical references page 45

MODULAR SUSPENDED UNIT

Modular is also impressive and elegant on its own. The suspended module, available in customised sizes, furnishes while making every corner of the home practical.

technical references page 45

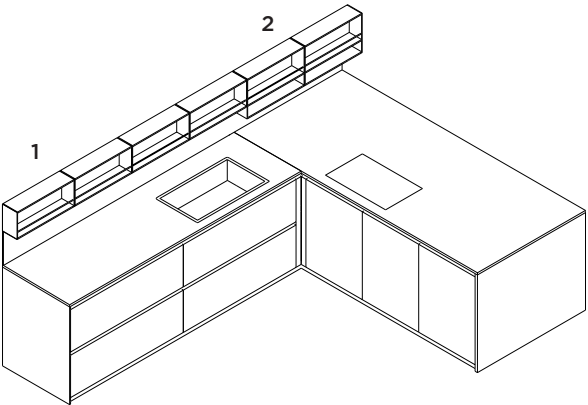

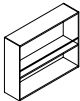

MODULAR SUSPENDED UNDER CABINET UNIT

Modular can also be made in two suspended under-cabinet versions. This solution combines personality with storage space and complete flexibility in using the worktop.

1. single suspended under cabinet unit

2. double suspended cabinet under cabinet unit

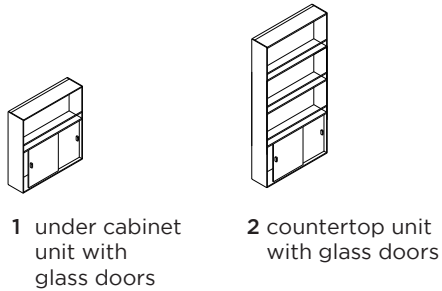

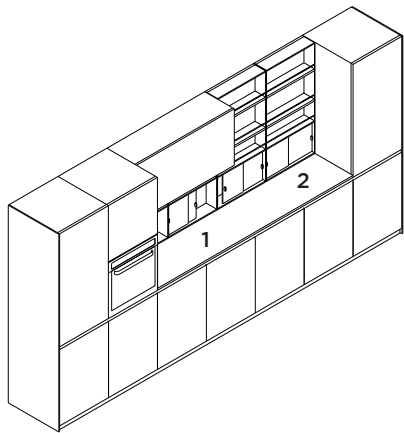

technical references page 45

MODULAR GLASS

Modular can be customised with two sliding glass doors. In addition, the customer’s back panel or shelves can also be included with a customised finish (back panel and shelves not supplied).

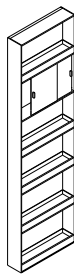

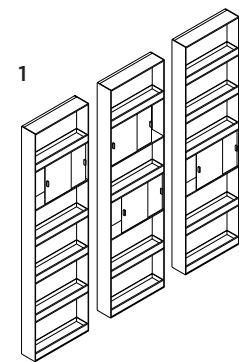

technical references page 45

MODULAR LIVING TALL UNIT

Enhanced by the inclusion of lights and sliding glass doors, the Modular system also furnishes the living area with elegance and personality.

1. living tall unit with glass doors

friulana/design

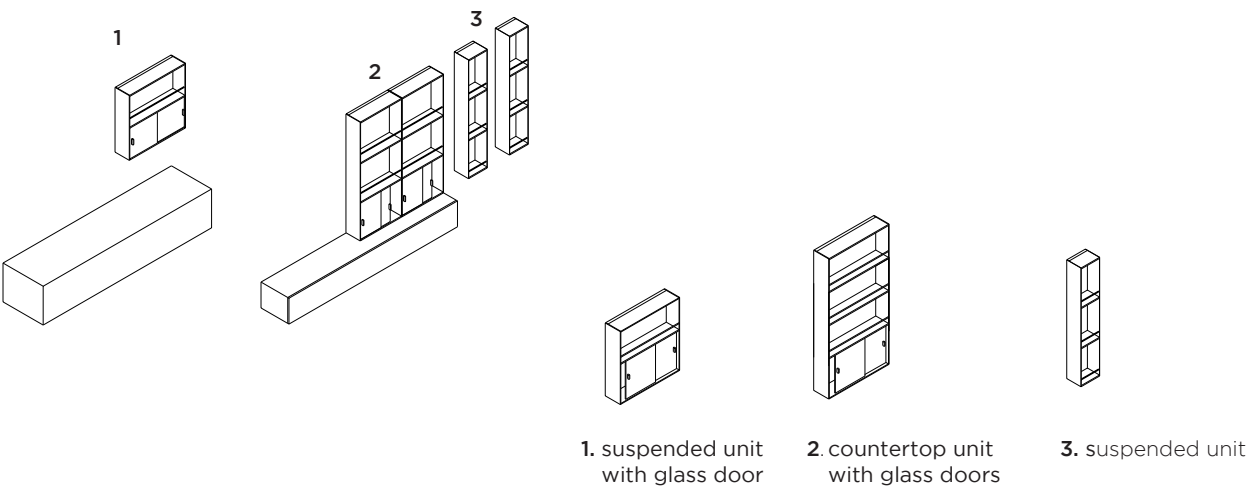

modular

MODULAR FLEXIBILITY

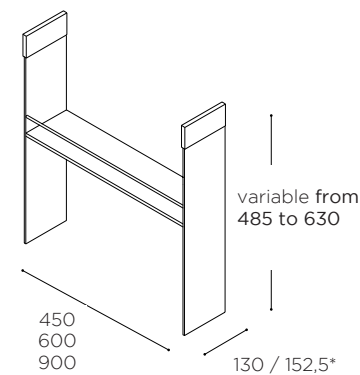

The highly versatile system allows all modular elements to be used also in the bathroom: tidiness and elegance.

All modules are available with or without an under-shelf LED light
* The side panel is available with D. 130 or 152.5. The latter allows a back
panel made by the customer to be inserted (back panel not supplied).

VARIANTS

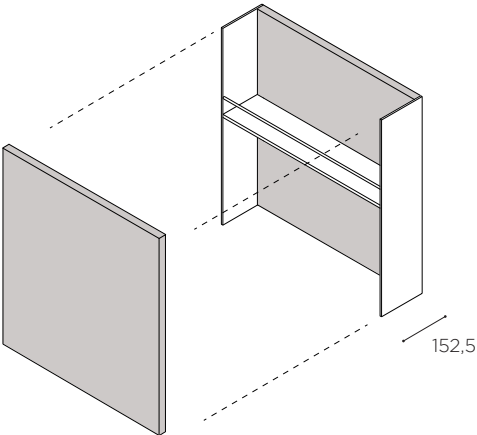

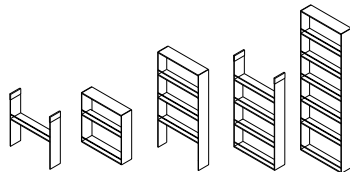

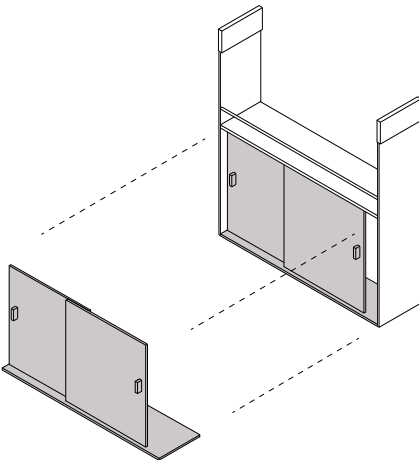

with LIGHT

The Modular shelf profile can house a 3000k or 4000k LED light. A dimmable option with wireless remote control is available on request.

with GLASS DOOR

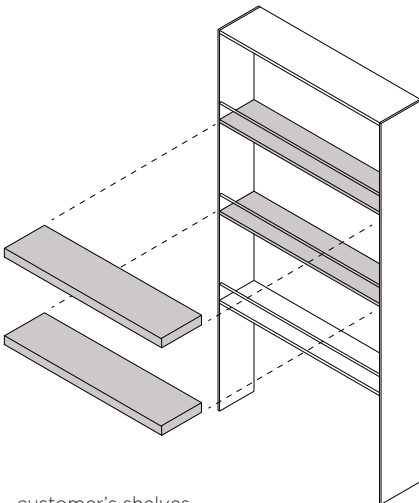

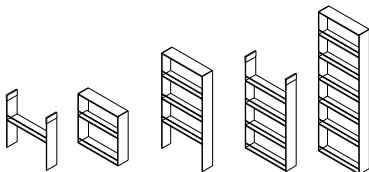

Modular can be customised with two sliding glass doors, available in grigio satinato and bronzo trasparente finishes.

customer's back panel

with CUSTOMER'S BACKPANEL

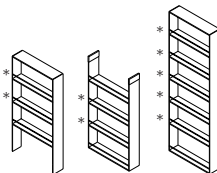

A version is available for inserting a back panel made by the customer (back panel not supplied). In this case, the depth increases to 152.5 mm.

customer's shelves

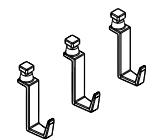

with CUSTOMER'S SHELF

Customer can also use their own shelves with a customised finish.

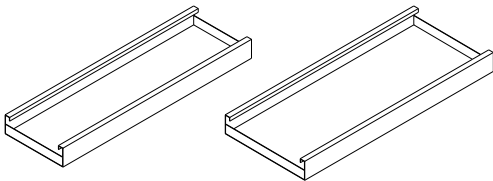

* replacements can only be made for selected shelves

ACCESSORIES

SET OF 3 HOOKS

The under cabinet unit and the island unit are standard supplied with 3 storage hooks in a matching finish.

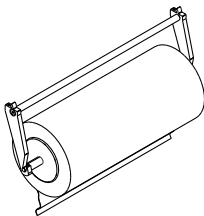

130

for island only

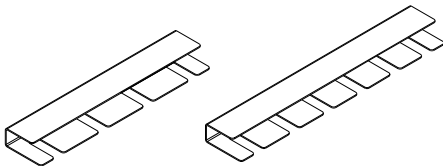

STANDARD TRAY - ISLAND TRAY

Practical storage tray, which can be snapped onto all modules.

ROLL HOLDER

Roll holder with easy installation.

TECHNICAL DETAILS

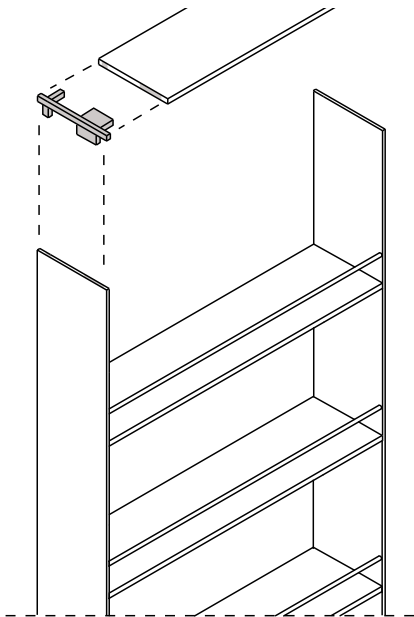

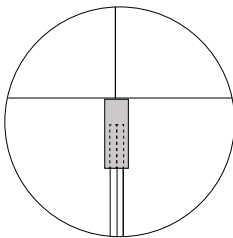

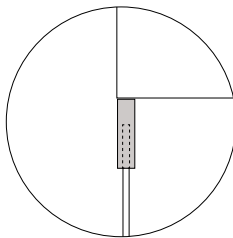

COMPENSATOR- registered model

The R&D lab at Friulana accessori has designed a compensator, a functional and innovative element that compensates for small differences due to different sizes between a worktop and a wall unit. This detail makes Modular versatile, flexible and suitable for use with various kitchen collections.

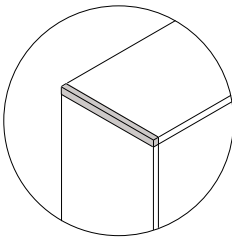

up to 40mm compensation

CORNER JOINT - registered model

Thanks to the innovative corner joint, Modular stands out for its easy snap-on assembly. The side profile can be shortened as required directly by the customer.
